

**The 3rd International Conference on Energy Conversion and
Renewable Energy Research (ECRER 2022)**
April 22-24, 2022 Changsha, China(Online)

Invitation Letter

Dear _____(sir/madam)

With the emergence of oil and energy crises, people have come to recognize the importance of low-carbon renewable energy. National Energy Administration stressed that renewable energy, as a vital part of China's diversified energy supply system, has great significance for promoting energy structure, protecting ecological environment, coping with climate change and thereby realizing sustainable economic and social development.

Following the success of the first (ESEPCE 2020) and second (ESEPCE 2021) conferences, The theme of the former International Conference on Energy Saving and Environmental Protection and Civil Engineering (ESEPCE) will be changed to the International Conference on Energy Conversion and Renewable Energy Research (ECRER) in 2022. It's to remove the theme of civil engineering and aims to focus on the latest innovations and knowledge in renewable energy and to stimulate new ideas and collaborations.

The 3rd International Conference on Energy Conversion and Renewable Energy Research (ECRER 2022) will be held in Changsha, China, from April 22-24, 2022. The conference will focus on the latest related research and serve as an international platform for scholars from home and abroad to share experiences, expand professional networks, exchange new ideas face to face and present research findings.

Conference General Chair

Prof. Hazlie Mokhlis, Department of Electrical Engineering, Faculty of Engineering,
Universiti Malaya

Prof. Zhongliang Liu, Beijing University of Technology

Guest Editor

Associate Professor, Muhyiddine Jradi, Center for Energy Informatics, University of
Southern Denmark

Keynote Speakers

Prof. Hazlie Mokhlis, Department of Electrical Engineering, Faculty of Engineering,
Universiti Malaya

Associate Professor, Muhyiddine Jradi, Center for Energy Informatics, University of
Southern Denmark

Prof. Chong Kok Keong, Fellow of Academy of Science Malaysia, Fellow of ASEAN
Academy of Engineering & Technology (AAET)

**The 3rd International Conference on Energy Conversion and
Renewable Energy Research (ECRER 2022)**
April 22-24, 2022 Changsha, China(Online)

Program

The 3rd International Conference on Energy Conversion and Renewable Energy Research (ECRER 2022), originally scheduled to be held in Changsha, China during April 22-24, 2022 will be changed to online conference due to COVID-19. The specific schedule will be notified by email in advance.

Registration fee

The conference organizer has entrusted Guangzhou KEO Information Technology Co., Ltd. to collect the fees for registration and publication from authors in mainland China; KEO is also entrusted to provide invoices for these payments to authors. (Beneficiary Bank Name: Industrial and Commercial Bank of China, Guangdong Provincial Branch, Guangzhou Tianhe Sub-BR, Account Name: Guangzhou KEO Information Technology Co., Ltd. , Account Number: 3602879819100299208)
