Abstract

The proceedings contain 83 papers. The topics discussed include: instance segmentation of high-resolution remote sensing images based on Bayesian classifier and discrete cosine transform; research on obstacle detection method for rail transportation under low-light condition based on infrared image; dynamic strategy attack: a reinforcement learning-based method for watermark protection; a method for detecting financial fraud in public companies based on federated learning; data anomaly detection based on mutual information feature enhancement; stair image segmentation detection based on deep learning; classification and recognition of infant sleeping positions based on dual model feature fusion; exploration and image display of fertilizer input based on grey prediction algorithm and decision tree classification; and a class incremental learning method with weight re-initialization and multiple distillation for image classification.

Conference Information

- Conference name: 4th International Conference on Artificial Intelligence, Automation and High Performance Computing, AIAHPC 2024
Conference date: July 19, 2024 - July 21, 2024
Conference location: Zhuhai, China
Conference code: 204700

Bibliographic Information

- Issue date: October 4, 2024
Publication year: 2024
Language: English
Part number: 1 of 1
Abbreviated source title: ACM Int. Conf. Proc. Ser.
Issue title: Proceedings of 2024 4th International Conference on Artificial Intelligence, Automation and High Performance Computing, AIAHPC 2024
Page count: 502
Abstract type: (Edited Abstract)

Compilation and indexing terms, © 2025 Elsevier Inc.
