Abstract

The proceedings contain 221 papers. The topics discussed include: evaluation of reliability model in electrical system; research on wireless dynamic magnetic resonance charging technology for autonomous vehicles; key technologies for multi-pathing in high-reliability multi-controller storage systems; design of intelligent analog circuit generation system; design of upper computer detection system for vibration parameters of mechanical equipment; design of intelligent warehouse management system; speech emotion recognition based on graph convolutional neural networks; reinforcement learning based container placement strategies; a study on sentencing for traffic offences based on the decision tree algorithm; design and implementation of an ultrasonic audio jamming system; framework design and theoretical research on abstract account gas payment mechanism; and research on key technologies of control-by-wire system for trackless transportation robot in coal mines.

Conference Information

Conference name: 4th International Conference on Electronic Information Engineering and Computer Technology, EIECT 2024

Conference date: November 15, 2024 - November 17, 2024

Conference location: Shenzhen, China

Sponsor: IEEE

Conference code: 206856

Bibliographic Information

Issue date: 2024

Publication year: 2024

Language: English

Part number: 1 of 1

Abbreviated source title: Int. Conf. Electron. Inf. Eng. Comput. Technol., EIECT

Issue title: 2024 4th International Conference on Electronic Information Engineering and Computer Technology, EIECT 2024

Page count: 1120

Abstract type: (Edited Abstract)
