Biography:				
<p>Raymond Li is an Assistant Professor of Economics at the University of Canberra. He received his formal training in Economics from Macquarie University, where he obtained both his Bachelor of Economics (Hons) and PhD in Economics. Prior to joining UC in 2019, Ray taught economics at the Hong Kong Polytechnic University and Macquarie University.</p> <p>Ray's research interests include applied econometrics, energy economics and energy policy. He is particularly interested in the estimation of energy consumption and testing market integration. His research outputs appear in a range of high impact factor international journals like the Energy Journal, Energy Policy, Energy and Applied Energy, among many others. Ray is an editorial board member of two international academic journals and he serves as ad hoc reviewer of research articles for many academic journals.</p>
